

## New Features

### LSD Maps

SentinelFM will support two maps – GeoMicro and LSD Maps.

The LSD map is an extra feature. An organization can have access to both these maps at the same time and switching between the maps is possible by selecting the Map Type under User Preferences Screen.

LSD maps is on a session by session basis which means if the user logs out and logs in again the map that will be displayed will be the default map which is GeoMicro.

<b>User Preferences Info:</b>	<b>English Français</b>
Map Type:	GeoMicroRemoting
Time Zone*:	GeoMicroRemoting
Miles / Kilometers:	LSD
Default Fleet:	All Vehicles

### Map Options

The user has the option to view the Geozones and Landmark Radius on the map and history page.

The option can be enabled or disabled under Map Options placed on the left side of the Map
