

## New Features

### Localization

This feature allows the user to choose either English or French from the login screen or from the User Preferences page.

### Map Navigation

The map page has two toolbars one on the left hand side of the map and one below the map.

The toolbar on the left hand side of the map is used for navigational purposes.

- The arrow keys are used for navigating in the respective directions

There are buttons to zoom in  or zoom out  on the map screen.

The intermediate buttons () placed between  and  have fixed zoom levels. Another method to zoom is to press and hold the left mouse button on the map and drag to the desired location and release the left mouse button. This selected location will be zoomed in.

To completely zoom out or to return to the home view of the map

The map options button allows the user to select options based on his/her preferences. The user has the option of displaying vehicle names, landmark names or to display landmarks on the map.

Resizable window with resizable control. This button enables resizing the map according to the size of the browser. For example if the browser is reduced in size the entire map is not visible; pressing this button resizes and displays the entire map.

The toolbar placed below the map allows the user to retrieve information about their fleet. It is *mandatory* for the user to choose a fleet before using these commands. Once a fleet is chosen, the vehicles in that particular fleet will be displayed.

Update Position: Displays the current location of the vehicle at that instant. One or more vehicles have to be chosen to use this command. The vehicles can be chosen by checking the check box placed on the right hand side of the vehicle.

Map It: Displays the last reported position of the vehicle. One or more vehicles have to be chosen to use this command. The vehicles can be chosen by checking the check box placed on the right hand side of the vehicle.

Tools: This has a drop down list with the following features:

Search – Allows the user to search for the vehicle based on Description, License Plate, Landmark, Box ID and Street Address.

Sort by – Sorts and displays vehicles based on Date / Time, Vehicle or Status. Selecting date / time the first time sorts the data in ascending order and choosing it again sorts it in descending order. The same is applicable for Vehicle and Status.

Select All [ ] – Selects all vehicles in that particular fleet.

Auto Refresh [ ] – Refreshes the page

Full Screen – Allows the user to switch between Map view and Grid view. To exit from the Grid view select the Close Window option displayed on the top right hand corner.

## History Page

The toolbar is placed on the left hand side of the page and has the same functionalities as the map page. The only difference is with the map options button  and the options are to show landmarks, show landmark names or to show breadcrumb trail on the map.
